DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group 1, claims 1-22, drawn to a combustible fuel source.

Group 2, claims 23-26, drawn to a stove.

The inventions listed as Groups 1 and 2 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The limitations common to independent claims 1 and 23, i.e., the limitations relating to the fuel source, do not define a special technical feature because they are not patentable. As evidenced by the references listed in the International Preliminary Examination Report, these limitations were known. Thus, because the limitations common to both claims 1 and 23 were known, the requirement of a single inventive concept is not met. See PCT Rule 13.1.
